

5 Year Old Curriculum Guide

Linglestown Christian Nursery School

We are pleased to share our curriculum plans for our five year old classes!

Transitional Kindergarten at Linglestown Christian Nursery School gives five year old children another year of preschool. This gift of time will give your child an opportunity to gain confidence and skills needed to be successful in the future school years.

Your Five year old is polishing their social skills which will prepare them for their future experiences in life. Confident learners separate from their family, get along with their classmates, work in groups and by themselves, solve problems, and express their ideas and needs. Acquiring social skills is the most important part of nursery school.

Large motor skills are developed as your child plays on the playground, and participates in music and movement activities. Math and science are incorporated throughout the year within our monthly themes.

Social studies and history are brought to life by the study of holidays throughout the school.

Your child will be introduced to literacy and math skills through ACSI "I Know How to Count and Write". Through age appropriate instruction, the children will gain small motor control through writing, pre-reading activities and improve their math skills.

In addition, the children will also work on their Weekly Readers which will enhance their literacy, math, science and social skills and knowledge.

Lastly, our Bible component is from "ACSI Bible Curriculum for Five Year Olds." These lessons assist children in learning Bible stories and then putting them into practice in their everyday lives. Character development is emphasized in our monthly character themes. The children have twenty-six memory verses that they use throughout the year.
